

DS ANGOLA

Growth Engineering

Digital systems that underpin real growth.

Software, infrastructure and security for your business
operations.

Your business technology partner.

DS Angola develops software, builds digital platforms and carries out networking, IT infrastructure and video surveillance projects. We bring these capabilities together to address a range of organisational technology needs.

Our portfolio includes invoicing and human resources systems, e-commerce, e-learning, corporate websites and technical work at client premises.

2025

DS Angola brand
begins operations.

2026

Nexara Angola incorporated
on 29 January.

DS Angola is the trading brand of NEXARA ANGOLA - COMÉRCIO E SERVIÇOS, (SU), LDA.

NIF: 5002877872

Technology for different business needs.

01 Business software

Custom systems, invoicing, HR, dashboards, e-learning platforms and e-commerce solutions.

02 Networks & IT infrastructure

Business network implementation, rack equipment installation and organisation, and technical infrastructure work.

03 CCTV & video surveillance

Camera installation and video surveillance implementation, with scope defined around the needs of each site.

04 Digital experience & integration

Corporate websites, portals, digital interfaces and solution integration based on each project's processes and requirements.

Rochete Consultoria

Networks & IT infrastructure / Consulting

Actual photographs of technical work and rack-mounted equipment.

On-site technical delivery

Networking and infrastructure work delivered for Rochete Consultoria. The photographs document technical intervention and equipment arranged in a rack, illustrating the physical infrastructure side of DS Angola's work.

WJ Vias Engenharia Lda

Corporate website and CCTV / Engineering & construction

Two deliveries for the same organisation.

CCTV installation photograph and corporate website screenshot.

DS Angola delivered WJ Vias' corporate website and a video surveillance installation project. These separate deliveries demonstrate the ability to address both digital and physical technology needs for the same client.

Software for business operations.

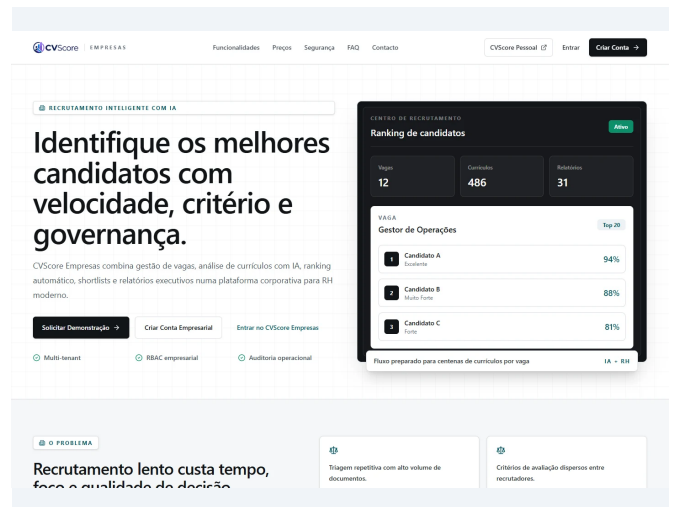

Billexe

INVOICING

An invoicing system developed by DS Angola. An example of business software focused on a specific management need.

CVScore Empresas

HUMAN RESOURCES

A business HR platform with dashboards and information management. Part of the CVScore family of solutions.

empresas.cvscore.ao

Platforms for commerce and learning.

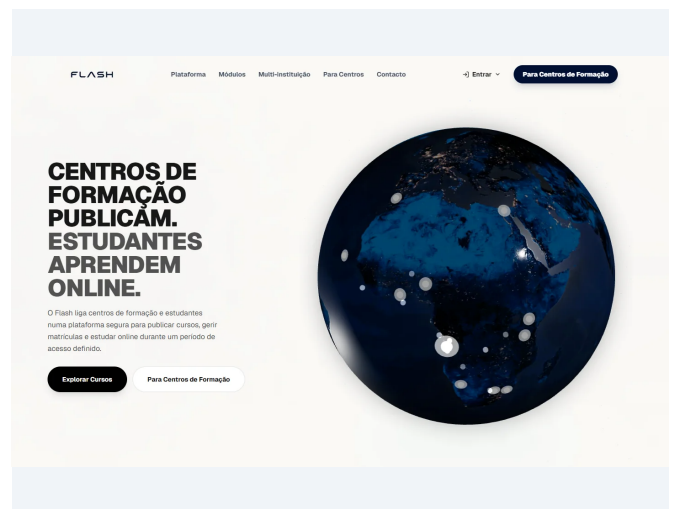

Mokobiz

E-COMMERCE / MARKETPLACE

An e-commerce and marketplace platform, demonstrating the ability to develop digital products for the retail and commerce sector.

mokobiz.com

Flash Academy

E-LEARNING

An e-learning project presented at flash.ao, demonstrating the application of digital platforms to education and training.

flash.ao

Screenshots of the projects' public interfaces.

From discovery to ongoing support.

01 **Discovery**

Understand the organisation's needs, context and priorities.

02 **Planning**

Define scope, deliverables, responsibilities and timeline.

03 **Implementation**

Develop the solution or carry out the agreed technical work.

04 **Testing**

Check operation against requirements and address identified issues.

05 **Handover**

Present the solution and the information needed to use it.

06 **Support & maintenance**

Agree support arrangements suited to the solution and the client's operations.

Proven delivery across different contexts.

Software and physical delivery

Digital products, websites, networking and CCTV in one portfolio.

Solutions shaped by context

Scope is defined around the needs and conditions of each project.

Continuity after handover

Support and maintenance can be part of the engagement, on agreed terms.

Sectors represented in this portfolio

Engineering & construction · Consulting · Commerce
Human resources · Education & training
Business management & invoicing

Let's talk about your operations.

Tell us what you need to build, improve or implement. DS Angola will help define the next step with you.
